

## Who is Deposita®?

Deposita® Systems is a South African registered innovation-led payment system solution provider for the secure collection & validation of banknotes within retail & banking environments.

The Deposita® Automated Banking Machine (ABM®) registers each banknote deposited, whilst the Deposita® Data Centre records & reconciles each deposit transaction. Details of all transactions are immediately accessible via the user friendly web portal.

## Value offering

- An automated electronic cash management solution;
- Note count & validation at point of tender;
- Electronic settlement of the value collected into the client's nominated bank account;
- On site and in-transit risk mitigation (terms and conditions apply);
- Multiple banking facilities;
- "One-Stop-Shop" – Provide complete value chain.

## Africa's Leading Cash Management Solution

### Reliability

The ABM® provides one of the highest acceptance rates in the industry.

### Easy

The ABM® makes cash transactions faster, easier, safer and more reliable than ever before.

### Value

The ABM® delivers the highest quality & security at great value for money and reduces associated cash costs.

### Improved Productivity

The ABM® will improve operational efficiency, reduce operational costs & increase customer satisfaction.

### Security

High security-advanced algorithms reduce the acceptance of counterfeit currency & ensure consistent high quality recognition.

### Reduce Shrink

Increased control of the cash handling process frees staff resources for more business orientated services.

### Risk

Effective management of risk both onsite and in transit.

### Deposit Identification

The ABM® identifies all deposits per depositor.

### Software Upgrades

The ABM® features a reprogrammable flash memory with remote downloadable software updates.

### Maintenance

The modular design of the ABM® makes it easier to install, service & maintain.

### Reports

Electronic itemised cash deposit reports & history of all related deposit transactions, accessible via a user friendly web portal.
